DETAILED ACTION

Claim Objections

Claims 16 and 17 are objected to because of the following informalities: before “fixedly”, --respectively-- should be inserted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14, 15, 18-21, 23, 24, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor #4,325,463. Taylor discloses sawhorse bracket assembly, each comprised of a one piece U-shaped channel 14 that receives an elongate beam 12, connector holes, as best seen in Figures 3-5, tubular leg receptacle assemblies 18 (upper), 26 (lower), the upper portions of which interengage a sidewall and base of the respective channel 14, and are fixed relative to the channel 14.

Allowable Subject Matter

Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claims

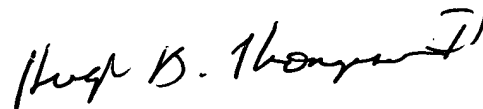

Art Unit: 3634

17 and is the inclusion of recesses including a pair of aligned notches, each notch respectively engaging the base and side wall of the channel.
